Education

University of Waterloo

Honors Bachelor's Degree, Computing and Financial Management - Double Major in Computer Science and Finance

September 2022 - Present

Waterloo, ON

Work Experience

Kento Health

May 2025 - Present

Technical Product Manager, B2C Launch

Montreal, Quebec

- Drove cross-functional readiness across Product, Engineering, Legal, and Clinical for the **B2C app launch**, integrating subscription flows and onboarding for **100+ early-access users**, achieving a **65% engagement rate** within the first month.
- Conducted **funnel analysis** (click-through to onboarding to retention) to identify **product-market fit signals**, iterating features and **go-to-market strategy** that increased onboarding completion by **20%**.
- Built internal dashboards with **Tableau** and **SQL**, and authored technical documentation to provide real-time visibility into **product performance**, ensuring alignment across clinical and engineering stakeholders.
- Built a **Python-based automation pipeline** that generated article thumbnails, uploaded them to **AWS S3 buckets**, and synchronized metadata with **Strapi**, eliminating **100% of manual processing** and reducing content publishing time by **80%**, enabling a scalable **Netflix-style Learn page** within the Kento app.

Questrade

Sept 2024 - Dec 2024

Business System Analyst/Product Manager Intern

Toronto, Ontario

- **Developed** an MVP for the notification center by conducting industry research, **improving feature alignment by 30%** and reducing miscommunication across teams.
- **Benchmarked** banking industry OAA flows to identify security gaps, **reducing onboarding friction by 15%**, enhancing user experience.
- **Presented research on security features through slide decks**, leading to **approval for security enhancements** in the next sprint.
- **Created product roadmaps** in Miro, prioritizing features based on competitive analysis, **reducing planning time by 30 minutes per sprint** and improving roadmap clarity.

Fallyx

June 2024 - August 2024

Technical Product Manager

Toronto, Ontario

- **Led integration** of AI-driven falls analysis systems, ensuring **100% secure data flow** and regulatory compliance, reducing risk of data breaches.
- **Developed** a multi-facility dashboard for real-time falls tracking, **automating reporting** and saving staff **30+ minutes per day** across **15+ senior homes**.
- **Optimized AI data processing** by working with engineering teams, **cutting manual reporting time by 50%** and improving data accuracy.
- **Conducted A/B testing** with senior home staff to assess UI/UX changes, **increasing adoption rate by 25%** and refining insights for streamlined reporting.

CIBC

January 2024 - April 2024

Application Developer

Toronto, Ontario

- **Analyzed financial data** using **SQL** and **JSON** queries in Elasticsearch, **deriving key insights** that improved strategic reporting accuracy by **20%**.
- **Optimized payment failure detection** by leveraging API calls, **reducing payment rejections by 30%** and improving data integrity.
- **Refined error detection** with **Python scripts**, integrating **BS4** and **Pandas**, enhancing payment processing accuracy by **25%**.

Projects

InnSight - Hotel Camera Analytics Platform (Startup Co-Founder) | March 2024 - Present

- Developed a proactive video analytics solution with **OpenCV** and **PyTorch**, using **Twilio** for instant alerts to hotel staff about unattended guests, queue issues, and security
- Created a crowd analysis algorithm using **scikit-learn's DBSCAN** to optimize staff deployment and manage queues effectively
- Utilized **MongoDB** to store real-time data events and **Figma** for prototyping to build a dynamic web app for hotel managers to visualize flow patterns and operational metrics, deployed it on an **AWS EC2**.
- Ran pilot with a partner hotel, enhancing their staff allocation by **15%** and reducing guest wait times by an average of **30 seconds**
- Placed in the **top 8 out of 80+** teams in Waterloo's Velocity Incubator **\$5K Pitch Competition**, where my team developed and presented a pitch deck to demonstrate the product's market potential

Technical Skills

Languages: Python, SQL, JavaScript, R, Racket, Java, VBA, HTML, CSS, C/C++, Go

Tools/Frameworks: Tableau, Power BI, Microsoft Excel, Figma, MySQL, Selenium, Postman, Rest API, Bash, Git, AWS, Pandas, Numpy, Matplotlib, scikit-learn, TensorFlow, Linux, Flask, Node.js, MongoDB, Azure, Express, Pytorch, BS4, Jest, OpenCV, YOLO, Streamlit
